Please visit www.cityofmesquite.com/Homeless to find out how you can volunteer, donate and "Give Wisely."

Conduct a public hearing and consider an ordinance for Zoning Application No. Z0525-0397 submitted by Austin McDaniel, on behalf of Simple Development Partners, for a Comprehensive Plan amendment to change the future land use designation from Commercial to Light Industrial and a change of zoning from Planned Development (PD) - Light Commercial Ordinance No. 2174 and Traditional Neighborhood Mixed Residential to PD - Commercial with a Conditional Use Permit being granted for a brewery, along with modified development standards to allow a light industrial development that includes uses permitted in the Commercial Zoning District, as well as permitting warehouse distribution, beverage manufacturing, and other manufacturing located at 2100 E US Highway 80.

(No responses in favor and one in opposition to the application have been received from property owners within the statutory notification area. The Planning and Zoning Commission recommends approval with certain stipulations.)

A public hearing was held for Zoning Application No. Z0525-0397.

Adam Bailey, Director of Planning and Development Services, stated that the applicant is requesting a Comprehensive Plan Amendment and a change of zoning to allow a light industrial development on a 7-acre tract located southeast of Jane Street and the US Highway 80 service road. The proposed development would include a 96,000-square-foot tilt-wall concrete building for commercial uses, warehouse distribution, and light manufacturing. Although not formally a party to the application, the developer is working with a Dallas-based brewery that may occupy a significant portion of the building for brewing and distribution operations. The brewer also envisions using the site for a 7,500-square-foot taproom, food trucks, and/or a restaurant.

Mr. Bailey stated that the Texas Alcoholic Beverage Commission (TABC) allows brewers to serve malt beverages produced at the facility or give samples to customers but only using beverages made by and at the facility. A brewer can sell beverages for off-premise sales. A customer is limited to 288 fluid ounces - or 2.25 gallons - of malt beverage per calendar day. The developer and brewer believe that adding the taproom, restaurant, or food trucks could complement the City's Heritage Trail, where Phase 2 of the trail is currently under construction, along the east side of the property.

Mr. Bailey stated that in order to address site constraints, the applicant has submitted a concept plan and proposed development standards. Key features include:

- Locating the building closer to the west side of the property with a 25-foot setback along Jane Street.
- Placing the truck court on the east side of the building, oriented away from nearby residential neighborhoods to the west.
- Reconstructing Jane Street to a standard that supports the proposed development and improves overall access.
- Ingress to the site from Jane Street across from the church and Loyce Drive.

Mr. Bailey stated that the proposed Planned Development (PD) would permit all uses allowed by-right in the Commercial Zoning District, in addition to warehouse distribution uses. The PD would also allow assembly of finished products or parts, primarily from previously prepared materials, as a permitted use. All other manufacturing uses would require approval through a Conditional Use Permit (CUP). While the applicant requested that the brewery be permitted by-right, the Planning and Zoning Commission approved it with a CUP. City Council has the discretion to approve the PD with the brewery either permitted by-right or subject to a CUP. Should City Council choose to require a CUP, no separate application will be necessary, as it can be approved with the current application.

Applicant Stephen Graham, representing Simple Development Partners, presented an overview of the proposed development and a brief video was shown highlighting the Manhattan Project Beer Company. The proposed development will include a 96,293 square-foot manufacturing facility and a 7,560 square-foot restaurant or taproom. The manufacturing facility will be duplexed to accommodate two separate tenants. Manhattan Beer Project Company is currently North Texas' fastest growing brewery and is planning to occupy half of the manufacturing space for their corporation headquarters with an opportunity for future expansion. They are also planning to occupy the restaurant and taproom building fronting Heritage Trail. Peak occupancy for the restaurant and

taproom, at their Dallas location, is 7:00 p.m. and operations typically close at 10:00 p.m.

Mr. Graham stated that the project includes complete reconstruction of Jane Street including a new storm sewer, new sidewalk with curbs, new 31-foot-wide street, and new irrigated landscape on the east side of Jane Street.

Karl Sanford, Owner of Manhattan Project Beer Company, stated that the manufacturing facility could receive approximately 8 to 12 deliveries per week and will be within normal 8:00 a.m. to 5:00 p.m. business hours. The Manufacturing facility's operating hours will be 7:00 a.m. to 8:00 p.m.
