

Council Summary Motorola Support Agreement

The proposed agreement continues our current support and maintenance for CAD, RMS, and our MDCs (police and fire) through the end of October or until we terminate the agreement. We have operated under these terms since we started using Motorola PremierCAD products. Although these products are no longer being developed, we would need Motorola's support in bringing them back up if they crashed. We plan to terminate the agreement as soon as we go live with Spillman Technologies.

The cost for this support will be \$31,291.16 per month.
