

MEMORANDUM

TO: The Honorable Mayor and City Council

FROM: Cliff Keheley, City Manager

DATE: April 3, 2019

SUBJECT: Traffic Signal "Night Flash" Changes

The City's traffic signal system is designed to operate in a "Night Flash" operation from 11:30 p.m. to 5:00 a.m. During the night flash process, major street signals will flash yellow and minor street signals will flash red. Attached is a list of intersections where this operation is currently implemented.

Staff has evaluated this operation and has recommended adjustments to the times. A majority of cities that implement this operation utilize a time period of 11:00 p.m. to 6:00 a.m. The goal of this program is to minimize nighttime traffic delays at major and minor streets and the expansion of this time would further impact this goal.

If Council has no objections, staff will proceed with placing this item on the next agenda. Please let me know if you have any questions.

Cliff Keheley
City Manager
