Provider Security Standards

The following is a brief summary of the measures that we have taken as your broker to review and report to you objectively on the financial security of your insuring companies. Information is included on A.M. Best Company, our primary security rating source, and the internal standards, which we have established to address this important issue for our customers.

MSW Security Review -McGriff, Seibels& Williams has established an internal "Security Review Group" composed of senior management representatives from the Finance, Marketing, Branch, Wholesale and Administrative Divisions of the company. This group's purpose is to develop and implement all procedures and standards for the financial security of all insurers, intermediaries and associations used by MSW and its subsidiary companies.

This group meets periodically to review the current listing of all companies, intermediaries and associations, which are actively used by MSW. It will also act on any pending requests received from throughout the company to have new Providers activated, and to deactivate any Providers that do not meet current MSW standards. MSW Provider Classifications:

"Approved Provider" is any Provider whose A.M. Best's rating is A-or higher. The Best's rating of an "approved" Provider must be printed on all MSW Confirmations of Coverage (Binders) and proposals delivered to clients or prospects.

"Exception Provider" is certain Providers with a rating lower than A-, including those companies "not rated by A.M. Best" which after review by the Security Review Group will be an approved security.

Any Provider approved by MSW receiving an A.M. Best downgrade of rating will be posted on our website (www.mcgriff.com). A downgrade that results in an "Approved" Provider moving to a less than A-A.M. Best Rating will be communicated to you in writing.

Profitability*Spread of risk

History -A.M. Best Company was incorporated in 1899 as the first rating agency in the world to offer reliable information on the financial condition of U.S. insurance companies. The Best's Rating Guide was first published in 1900, and has since become a cornerstone of the security review process by continuously evaluating the financial integrity of over 4,100 insurance companies. In 1984, the first edition of the Best's International Rating Guide was published, reporting on the claims-paying ability of over 950 international insurers.

The information used by Best to rate insurance carriers is provided by the companies themselves as a part of their normal filings with the National Association of Insurance Commissioners, those states in which the company is licensed, the SEC and/or with its shareholders. Rating reviews are performed annually on each insurance company and on an interim basis as conditions dictate. Best's Rating System -The Best's rating system is designed to evaluate a wide range of objective and subjective factors that affect the overall performance of an insurance company (not applicable to associations or intermediaries). These factors deal with the company's financial strength, its operating performance and its ability to meet its financial obligations to policyholders, as follows:

*Quality of reinsurance program*Leverage/Capitalization

*Quality and diversification of assets*Liquidity

*Adequacy of policy loss reserves*Adequacy of policyholder's surplus

*Capital structure*Management experience and objectives

Best's Rating Symbols -A typical Best's rating is composed of two parts. The "Security" portion provides an alphabetical indication of the quality of the security provided by a company to its policyholders. This rating is further defined in three categories, "Secure", "Vulnerable" or "Not Assigned". The "Financial Size" (FSC) portion of the Best's rating uses Roman numerals to rank companies based on the dollar amount of their policyholder's surplus and contingent reserve funds.

While comparative rankings for security or financial size by themselves may not adequately portray the complete financial health of a company, the combination of the two has proven to be reliable in predicting the ability of a company to meet its claims obligations in a timely manner, both now and in the near future. The actual rating symbols used by Best and their meanings are:

"Secure" RatingsA++ or A+Superior
A or A-Excellent
B++ or B+Good
"Vulnerable"B or B-Fair
RatingsC++ or C+Marginal
C or C-Weak
DPoor
EUnderSupervision
FIn Liquidation
SSuspended

"NR" Not Rated Designation –Assigned to companies not rated by A.M. Best.
